RE: Timbercon RoHS Compliance

The adoption and implementation of environmental protection regulations and legislation has become an issue of critical importance for the high technology industry. Timbercon, Inc. has implemented processes and policies ensuring compliance with all applicable regulations pertaining to Timbercon customers, vendors, products, and services.

RoHS, or Restriction of Hazardous Substances legislation requires that any electrical and electronic equipment (EEE) containing certain compounds including lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB), and polybrominated diphenyl ether (PBDE), comply with the maximum agreed allowance of these compounds by July 1, 2006.

To promote the future success of our customers, suppliers, and the environment, Timbercon, Inc. has successfully completed RoHS compliance on all products, unless otherwise specified.

For compliance information and certification on a specific Timbercon product, please contact your account manager via phone or e-mail at, 503-827-8141 or [info@timbercon.com](mailto:info@timbercon.com) respectively.

Sincerely,

Eric C. Meslow  
President
