

Fiber Optic Cleaning Kits

timbercon

BENEFITS

- Top quality consumables for effective cleaning
- Multiple products/methods for proper cleaning of virtually and optical connection
- Available replacement consumables for easy kit replenishment
- Several kit sizes designed to kit a range of application requirements
- Portable, self contained design

APPLICATIONS

- Routine cleaning
- Installation preparation
- Splicing preparation
- Termination preparation
- Field maintenance

Preserve the life and integrity of your fiber optics with Timbercon cleaning kits

Timbercon cleaning kits provide comprehensive solutions for the cleaning, preparation, and maintenance of fiber optic connectivity products. Offered in multiple sizes, each Timbercon cleaning kit incorporates top quality consumables designed to offer optimal performance with a variety of connectors, adapters, and terminations.

Timbercon cleaning kits are available in four standard sizes and configurations to suit any cleaning requirement, large or small. All cleaning kits feature a rugged plastic case with custom foam interior for easy product organization,

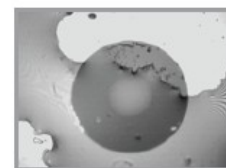

PREMIUM SOLUTIONS

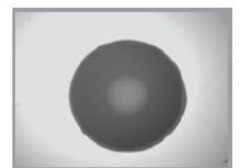

Why is cleaning important?

Maintaining a clean connection or mating point is critical to the performance and proper function of any fiber optic link. The presence of dirt, dust, oil, and other contaminants can cause substantial (signal loss) attenuation, or in some cases completely block signal transmission with connectors, adapters, attenuators, and pin/socket terminations. In many cases, dirty connection points are the most common reason for connectivity and performance related issues in a fiber optic network.

Timbercon cleaning kits are designed to alleviate the common problems associated with cleaning of

Fiber Optic Cleaning Kits

▶ PART NUMBER GENERATOR

A - Kit Type

- 1 Adapter
- 3 Attenuator
- 5 Cleaning
- 9 Custom

B - Connector Basis

- 00 No Connector
- 03 FC
- 07 LC
- 11 MT
- 17 MT-RJ
- 19 MU
- 21 SC
- 27 ST
- 90 Mixed
- 95 APC
- 99 Custom

C - Kit Size

Enter kit size (number of pieces) in block (C) to denote kit size.

EXAMPLE:
8 piece = 008

D - Ferrule Type (Optional)

- A 1.25 & 2.5 mm
- B MT Male

▶ CONFIGURATION OPTIONS

Economy Cleaning Kit

Part Number: TK-500-003

Includes:

Hydrosorb lint free wipes
Travel safe, easy top cleaning solvent

Basic Cleaning Kit

Part Number: TK-500-006

Includes:

Hydrosorb lint free wipes
Travel safe, easy top cleaning solvent
Lint Free Kim Wipes®
1.25mm cleaning swabs
2.5mm cleaning swabs
Rugged carrying case

Standard Cleaning Kit

Part Number: TK-500-008-A

Includes:

Hydrosorb lint free wipes
Travel safe, easy top cleaning solvent
Lint Free Kim Wipes®
1.25mm cleaning swabs
2.5mm cleaning swabs
Cletop single fiber cleaning system
Cletop single fiber replacement tape
Rugged carrying case

Standard Cleaning Kit - MT

Part Number: TK-500-008-B

Includes:

Hydrosorb lint free wipes
Travel safe, easy top cleaning solvent
Lint Free Kim Wipes®
1.25mm cleaning swabs
2.5mm cleaning swabs
Cletop MT ferrule cleaning system
Cletop MT ferrule replacement tape
Rugged carrying case

Complete Cleaning Kit

Part Number: TK-500-010

Includes:

Hydrosorb lint free wipes
Travel safe, easy top cleaning solvent
Lint Free Kim Wipes®
1.25mm cleaning swabs
2.5mm cleaning swabs
Cletop single fiber cleaning system
Cletop MT ferrule cleaning system
2 Cletop replacement tapes
Rugged carrying case

▶ ABOUT

Founded in 1997, Timbercon, Inc. is a fiber optic product and solution manufacturing company providing a vast array of connectivity solutions to the data storage, telecommunications, military, industrial, broadcast and networking industries. In addition to standard fiber optic patch cords and attenuated test cables, Timbercon has pioneered proprietary products, many of which are now considered to be an industry benchmark.
